

PAS-BS30W | All Weather Wall Mounted IP66 Outdoor Box Speaker Pair

Key features

- Engineered for clear music and voice reproduction in any weather condition
- Sleek, modern appearance paired with high-quality audio performance
- IP66-rated waterproof construction for use in harsh outdoor environments
- Available with 4.25", 6.5", or 8" weather-resistant woofers and 1"/1.5" silk dome tweeters
- Dual-driver (2-way) design delivers rich, balanced sound
- Durable ABS housing with corrosion-resistant stainless steel grille and mounting hardware
- Supports both 70V/100V line systems with selectable power taps, or 8 Ohm direct connection
- Mounting bracket offers full 360° rotation for flexible horizontal or vertical setup
- Offered in classic black or white finishes to match any setting

Product Overview

The most compact model, the Macsys PAS-BS30W, is designed for smaller installations where space is limited but reliable outdoor audio is still essential. It features a 4.25-inch woofer and a 1-inch silk dome tweeter, offering smooth frequency response and surprising output for its size.

With 5W/10W/20W power taps and 8Ω compatibility, the Macsys PAS-BS30W is well-suited for distributed background music in outdoor cafés, garden walkways, and entryways. Despite its compact form factor, it shares the same IP66-rated ABS build and stainless steel accessories as its larger siblings, ensuring full weather resistance and a long service life.

Technical Specification

Features	Detail
Selectable Power	5W / 10W / 20W / OFF with 8Ω bypass
Nominal Power (8Ω)	30W continuous
Peak Output	60W max
Sensitivity (1M)	89dB ±2dB
Maximum SPL	104dB
Audio Range	100Hz to 20kHz
Coverage Pattern	H: 100° / V: 80° (at 1kHz)
Speaker Size	240 × 140 × 120 mm
Mounting Style	Compact wall-mount bracket with full adjustability
Construction	UV-resistant PP body with corrosion-proof hardware
Weight	1.6 kg
Color Options	Black / White
Driver Details	4.25" woofer + 1" silk dome tweeter
