

PAS-HS15W | Outdoor Horn Loudspeaker

Key features

- Waterproof design for reliable outdoor performance
- High IP rating for protection against dust and moisture
- 15W transformer for strong, clear sound output

Product Overview

The PAS-HS15W is a robust waterproof horn speaker designed for outdoor applications. Featuring a high IP rating, it offers excellent protection against dust and moisture, ensuring reliable performance in various weather conditions. With a 15W transformer, this speaker delivers clear, powerful sound, making it perfect for public announcements, event broadcasting, and other outdoor audio needs. Its durable, weather-resistant construction ensures long-lasting functionality and effective sound distribution for both commercial and recreational use.
