

PAS-MP-VRP | Voice Alarm & Record Player Module

Key features

- User-recordable voice message playback triggered by 8 dry contact closures.
- USB and SD card slot for flexible memory and file management.
- Front panel controls for easy recording and playback operations.
- 1.5" black and white graphic LCD for user interface.
- Rear locking switch to disable front panel buttons for security.
- Output via line with Euroblock connectors, supporting integration with other systems.

Product Overview

The Macsys PAS-MP-VRP is a voice alarm recorder and playback device that allows users to record and play voice messages triggered by up to 8 dry contact closures. It supports media on USB and SD cards, with front panel controls facilitating easy operation for recording and playback. A 1.5" black and white graphic LCD provides a clear interface. The device includes a rear locking switch to secure front panel controls and an output line connector with a Euroblock pitch of 3.5 mm. Additionally, it features a copy mode to transfer data between USB and SD card storage. This device operates on a power supply of 5V at 100mA.
